

PRESTATIEVERKLARING

DoP 0256

voor fischer FIF - PN (Kunststof verbindingen voor gebruik in beton en metselwerk)

NL

1. Unieke identificatiecode van het producttype: DoP 0256
2. Beoogd(e) gebruik(en): Ingespijkerd kunststof anker voor bevestiging van externe thermische isolatiecompositiesystemen (ETICS) met pleisterwerk in beton en metselwerk, zie bijlage, met name de bijlagen B1- B3.
3. Fabrikant: fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Duitsland
4. Gemachtigde: -
5. Het systeem of de systemen voor de beoordeling en verificatie van de prestatiebestendigheid: 2+
6. Europees beoordelingsdocument: EAD 330196-01-0604
Europese technische beoordeling: ETA-18/0253; 2018-05-29
Technische beoordelingsinstantie: DIBt- Deutsches Institut für Bautechnik
Aangemelde instantie(s): 2873 TU Darmstadt
7. Aangegeven prestatie(s):
Veilig gebruik (BWR 4)

Karakteristiek draagvermogen:	Karakteristieke weerstand onder trekbelasting:	Bijlage C1
	Minimale randafstand:	Bijlage B2
	Minimale hart op hart afstand:	Bijlage B2
Verplaatsingen:	Trekbelasting met partiële factor:	Bijlage C1
	Verplaatsingen:	Bijlage C1
Plaatstijfheid:	Diameter van de plaat van de plug:	Bijlage C1
	Belastingsweerstand van de plug:	Bijlage C1
	Plaatstijfheid:	Bijlage C1

Energiebesparing en warmtebehoud (BWR 6)

Warmtedoorgangscoefficiënt:	Puntwarmtedoorgangscoefficiënt van de plug:	Bijlage C1
	Isolerende laagdikte van de ETICS:	Bijlage C1
8. Geëigende technische documentatie en/of specifieke technische documentatie: -

De prestaties van het hierboven omschreven product zijn conform de aangegeven prestaties. Deze prestatieverklaring wordt in overeenstemming met Verordening (EU) nr. 305/2011 onder de exclusieve verantwoordelijkheid van de hierboven vermelde fabrikant verstrekt.

Ondertekend voor en namens de fabrikant door:

Dr. Oliver Geibig, Managing Director Business Units & Engineering
Tumlingen, 2021-01-15

Jürgen Grün, Managing Director Chemistry & Quality

Deze DoP is opgesteld in meerdere talen. In het geval van geschillen over de interpretatie zal de Engelse tekst altijd prevaleren.

Het aanhangsel bevat vrijwillige en aanvullende informatie in het Engels die de (taal-neutraal gespecificeerde) wettelijke vereisten overschrijdt.

Specific Part

1 Technical description of the product

The fischer FIF - PN consists of a plastic sleeve made of polypropylene (virgin material), a plate and an accompanying specific nail made of glass fibre reinforced polyamide (virgin material).
The anchor may in addition be combined with the slip-on-plate DT 90, DT 110 and DT 140.
The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verification and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 25 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Safety and accessibility in use (BWR 4)

Essential characteristic	Performance
Characteristic tension resistance	See Annex C 1
Edge distances and spacing	See Annex B 2
Plate stiffness	See Annex C 1
Displacements	See Annex C 1

3.2 Energy economy and heat retention (BWR 6)

Essential characteristic	Performance
Point thermal transmittance	See Annex C 1

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with EAD No. 330196-01-0604, the applicable European legal act is: [97/463/EC].

The system to be applied is: 2+

Installed anchor: FIF-PN

Legend

- h_{nom} = Overall plastic anchor embedment depth in the base material
- h_1 = Depth of drilled hole to deepest point
- h = Thickness of member (wall)
- h_D = Thickness of insulation material
- t_{tol} = Thickness of equalizing layer or non-load bearing coating

Product description
Installed anchor

Annex A 1

Appendix 2 / 8

Single parts : FIF-PN

1) Various length of the anchors are possible:

$$L_a = L_n \text{ (length of accompanying specific nail) } + 5 \text{ mm}$$

Determination of maximum thickness of insulation: $h_D = L_a - h_{nom} - t_{tol}$

e.g. FIF-PN 8x150:

$$L_a = 148 \text{ mm, } h_{nom} = 35 \text{ mm, } t_{tol} = 10 \text{ mm}$$

$$h_D = 148 - 35 - 10 \approx 100 \text{ mm}$$

Table A2.1: Marking

Anchor Type	FIF-PN
Anchor plate diameter	Ø 60 mm
Works symbol	 or  or blank
Size of anchor	Ø 8 mm
Length of anchor	L_a
Example	fischer (optional) FIF-PN  or  or blank CE (optional)  Ø 8 (optional) ABCDE (optional) XXXXXX= additional marking possible

Specifications of intended use

Anchorage subject to:

- The anchor may only be used for transmission of wind suction loads and shall not be used for the transmission of dead loads of the external thermal insulation composite system (ETICS).

Base materials:

- Normal weight concrete (use category A), according to Annex C1.
- Solid masonry (use category B), according to Annex C1.
- Hollow or perforated masonry (use category C), according to Annex C1.
- Lightweight aggregate concrete (use category D), according to Annex C1.
- Autoclaved aerated concrete (use category E), according to Annex C1.
- For other base materials of the use categories A, B, C, D or E, characteristic resistance of the anchor may be determined by job site tests acc. to EOTA Technical Report TR 051 Edition December 2016.

Temperature Range:

- 0°C to +40°C (max. short term temperature +40°C and max. long term temperature +24°C).

Design:

- The anchorages are designed under the responsibility of an engineer experienced in anchorages and masonry work with the partial safety factors $\gamma_M = 2,0$ and $\gamma_F = 1,5$, if there are no other national regulations.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchors is indicated on the design drawings.
- Fasteners are only to be used for multiple fixings of ETICS.

Installation:

- Drill method according to Annex C1.
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on the site.
- Installation temperature from 0°C to +40°C
- Exposure to UV due to solar radiation of the anchor not protected by rendering ≤ 6 weeks.

Annex B 2

Installation instructions:

1. Drill the bore hole by the parameters acc. to Table B2.1 and the corresponding drilling method acc. to Annex C1.

2. Insert anchor manually.

3. Set anchor by hammer blows.

4. Correctly installed anchor.
